EXPERIENCE

Quality Analyst
SP Madrid Philippines **March 2025 - Present, Quezon City**

- Performed quality assurance and validation of CI reports using the **OpenCI System**, ensuring data accuracy, completeness, and compliance with organizational and banking standards.
- Analyzed and verified report data to identify discrepancies, **risk indicators, and trends, supporting compliance monitoring, internal audits**, and process improvement efforts.
- Utilized **AI-assisted validation tools and performed outbound client verification calls using Receivable Management Software (RMS)** to confirm report information, resolve discrepancies, and enhance the accuracy, reliability, and efficiency of reporting processes.

Batangas State University ACTION Center
Web Developer Intern **January - May 2024, Batangas City**

- Designed and developed a **web-based platform for the ACTION Center** to facilitate the dissemination of public information, announcements, and community updates.
- Developed the application using **PHP, MySQL, HTML, Bootstrap, JavaScript, jQuery, AJAX, and SweetAlert, utilizing MySQL** for efficient data storage and management.
- Implemented key functionalities, including content posting, full **CRUD operations**, and **Role-Based Access Control (RBAC)**, ensuring secure and efficient content management.

PROJECTS

CC Verification Report Generator
- Designed and developed a web-based application to **automate the creation, management, and tracking of credit card verification reports,** reducing manual processing efforts.
- Developed features for report generation, **data validation, and record management, improving accuracy, efficiency,** and consistency in verification workflows.

Action Center Public Information System
- Designed and developed a web-based public information platform for the ACTION Center of Batangas State University to support the dissemination of **disaster preparedness information, announcements, and community advisories**.
- Developed database-driven functionalities using **PHP, MySQL, JavaScript, HTML, CSS, and Bootstrap,** enabling efficient content management, information retrieval, and secure data handling.
- Implemented key system features, including content posting, CRUD operations, and role-based access control **(RBAC)**, improving the accessibility, organization, and management of public information.
